ACCESS CONTROL

A crucial component of a comprehensive self-storage security plan is the access control system. This system seamlessly integrates with your property management system to ensure that only paying tenants can enter the premises and access their storage units. PTI Security Systems™ presents a cutting-edge system that blends state-of-the-art cloud-based software with exceptionally durable and advanced hardware components, delivering a user-friendly experience for tenants while maintaining the utmost security for your facility.

AP1 SMART KEYPAD - The Next Generation of Keypads

The AP1 keypad represents the next generation of forward thinking keypads by integrating 40 years of self-storage keypad expertise with the latest in technology and has set a new standard for the entire rental experience. By leveraging the latest Bluetooth technology that connects only with allowed (or paired) smart devices, security can be elevated further over a traditional 4 to 6 digit code while also providing tenants a completely hands-free experience.

Installers and operators will appreciate the on-board diagnostics, accessible locally or remotely though Storlogix Cloud, only found within the AP1 as well as the dual set of inputs and relays that installers require when wiring to enable doors held open alarms, doors forced open alarms, motion detection and more.

The rugged and smart clamshell design insures easier serviceability and its IP55 rating makes it highly resistant to wind, water and dust. Facilities in colder climates who have issues with keypad buttons freezing in winter can opt for the AP1 with an integrated on-board keypad heater thereby increasing its functionality in varying conditions.

StorID - Built for Today's Tenants

Built from the ground up to support the latest technology and hardware found in self-storage today, StorID is represents a re-imagination of the entire self-storage experience by further leveraging the hardware and software from within smart devices to create an entirely new experience for the tenant while providing operators increased automation capabilities with the the latest data encryption standards.

While the app itself will work with all legacy PTI products, facilities that have adopted the AP1 and ProEdge will realize the greatest benefits with increased data, greater tenant empowerment by allowing the sharing of digital keys and increased notifications around the entire rental experience including access granted/denied notifications, unit tampering, unit access and more. Operators will appreciate the branding opportunities found within the app as well as the SDK for enterprise integrations. Available for both Android and iOS devices.

# APEX KEYPADS - Configurable For Any Facility

PTI APEX keypads have become the standard within the industry for any facility requiring a rugged, feature rich keypad that has been time tested in a wide range of conditions and geographies. Its large, customizable display provides greater real estate for facilities needing location-specific messaging to tenants and additional branding opportunities for increased brand recognition.

The popular appeal of the APEX keypads revolves around the larger form factor and the opportunities to order based upon any site's specific requirements. Two way intercoms, proximity card readers, pinhole cameras and multiple languages can all be specified in order to create the ideal initial access control device for any facility while still providing multiple means of interaction with the keypad and the staff based on the overall experience intended for the tenant to have while visiting a facility. Inputs and relays are also available to wire for door held open alarms, motion detection and door forced open alerts.

OPTIONAL KEYPAD ACCESSORIES

PTI offers several accessories specially designed to maximize your tenant's experience while providing operators an attractive presentation of our access control keypads. Based on a facility requirements, we have multiple mounting and accessories options available.

ITEM	SKU	REFERENCE
Wall Mount	# 1000002	
Goose-neck	# 1000000	
Bollard	# 1000001	
Keypad Heater (APEX only)	# 1000045	
Keypad Cover	# 1000034	
1 Amp Power Supply	# 15000003	
2 Amp Power Supply (Recommended for AP1 w Heater, larger power supplies are available)	# 15000002	

CLOUDCONTROLLER - Native Cloud Security Hardware

The CLOUDCONTROLLER, paired with STORLOGIX CLOUD, establishes the core framework for robust access control and site security. By moving a facility's access control into the cloud, operators are able to maintain granular control over an entire facility remotely down to the unit and even tenant level. Multi-facility operations can also be centrally controlled providing increased options for greater efficiencies for operators.

With the CLOUDCONTROLLER, facilities also have access to a library of data allowing increased understanding of peak times allowing for better decision making around staffing of a facility. Complete audit trails around property and unit access is available and when a facility uses electronic smart locks, automated overlocking of delinquent tenant's units can easily be accomplished from within the cloud. Increased security is provided through Bluetooth-enabled functionality in the PTI CloudController, enabling enhanced connections with the latest smart devices.

STORLOGIX CLOUD - Award-Winning Access Control Software

Integrated with every major property management company in the industry, with STORLOGIX CLOUD, operators can maintain complete visibility and control over their entire portfolio from anywhere in the world. This cloud-based, access control dashboard eliminates the need to be on-site in order to view activity history, provide and restrict access to tenants, or pull detailed reports. While within STORLOGIX CLOUD, operators are also exposed to a wealth of KPI's allowing for the increased efficiency of an operation thereby maximizing resources while lowering net operating expenses.

Additionally, operators are exposed to alarms, alerts and customized at the property (and even unit level) allowing for a prompt and measured response depending on the notification. The on-board diagnostics provide owners and operators a greater understanding around the overall health of any facility and areas to investigate whenever an outage around a property of device occurs.

| Customized Notifications	Multi-Site Management	Device Health At-a-Glance
Real-time customized notification tools allow for an immediate response to the security events most important to your business.	Improve visibility and insights with events and data from an entire portfolio, region, or a single site, all from one centralized login.	Troubleshoot with ease and quickly resolve issues with a streamlined dashboard interface that identifies the root of any security incident.

STORLOGIX MOBILE - Operator Facing Access Control

The STORLOGIX Mobile app places the power of your access control system at your fingertips. Offering real-time site management capabilities, STORLOGIX Mobile enables operators to remotely trigger or hold any access points, delivering a more seamless experience for tenants.

Key features include the ability to open doors or gates from anywhere, customizable notifications regarding unusual on-site activity, constant visibility of on-site tenants, and the capability to suspend a tenant's status with a simple click. Operators will also appreciate the ability to conveniently the review current or historical site activity by tenant or unit.

STORLOGIX MOBILE empowers operators to remotely manage access control from anywhere with any connected smart device and provides unparalleled flexibility for conveniently managing and self-storage facility.
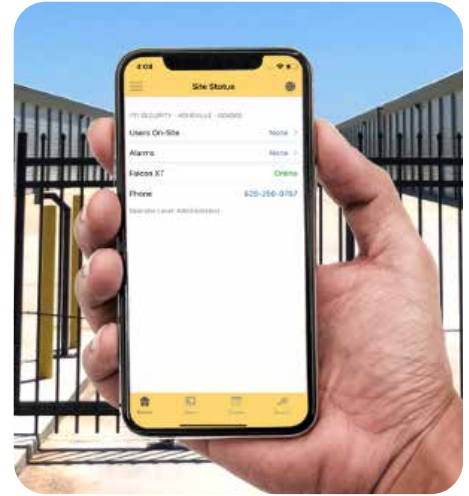

CLOUD MIGRATION OPTIONS

Migrating to the Cloud has never been easier or more important in order to take advantage of the latest automation technologies only available after first migrating to the award-winning, cloud-based STORLOGIX CLOUD solution. Depend on the hardware already deployed at any given facility, there are three different paths a facility can take to move a facility into the cloud for greater remote, automation capabilities. Streamline your operations while securely improving your bottom line from the comfort of the cloud.
