PTI Security Systems™ has been the leading provider of the most innovative and reliable access control products in the self-storage industry for over 40 years. During this time, PTI has become the industry standard for comprehenisve access control though our holistic, forward thinking and layered approach that holistically addresses the needs of tenants and operators for a complete solution.

SEAMLESS INTEGRATION PTI's platform seamlessly links your hardware and software together giving you greater control and visibility accross your portfolio.

SCALABLE & SECURE Tailor your access control solution to fit your site's unique security needs and expand as your portfolio grows.

BEST-IN-CLASS PARTNERS PTI works with the industry's best security integrators to ensure a local presence that supports you in achieving your vision.

ACCESS CONTROL SOFTWARE

Our software uses the latest technology to help self-storage businesses streamline their operations, minimize risk, and improve their bottom line.

ACCESS CONTROL HARDWARE

Backed by more than 40 years of experience, our hardware solutions are ideal for self-storage facilities that want flexibility, durability, and premium security

An access control system is an integral part of any self-storage security strategy. It integrates with your property management system to ensure that only paying customers are able to access the property and their units. Our current system incorporates the latest in cloud-based software with highly-durable, advanced hardware components to create a convenient tenant experience while ensuring your facility is always secure.

ACCESS CONTROL SOFTWARE - With StorLogix Cloud software, operators can easily customize all of their facility's access areas, review site activity, and monitor zones and alarms from one cloud-based account. Cloud-to-cloud technology creates a seamless integration and ensures your hardware is always up-to-date and delivering site data.

ACCESS CONTROL HARDWARE - Backed by more than 40 years of innovation and experience, the CloudController by PTI Security Systems™ enables over-the-wire automatic software updates for your access control system and works with StorLogix Cloud to build custom reports. Get the analytics you need to make smart business decisions and optimize your operations.

MOBILE APPLICATIONS - Access control apps built for self-storage contribute to both operational efficiency and customer convenience. The operator-facing app, StorLogix Mobile, gives operators the ability to carry out key tasks like reviewing site activity and triggering or holding access points remotely. The tenant-facing app, EasyCode, gves customers the ability to open gates and unlock individual unit security while monitoring unit activity and making payments.

PROPERTY and UNIT SECURITY -Distinguish yourself as a premium self-storage facility with PTI's individual door alarms and smart locks. By seamlessly integrating into your access control software, PTI's door security solutions increase the functionality and efficieny of your existing system while also improving the overall security of your self-storage facility.
