# How to Add and Edit Access Tester in StorLogix

Adding and Editing Access Tester

To add and edit Access Tester:

1. Click on your **Tools** in the home screen. (Alternatively you can click on the three bars in the top left corner to bring up the Navigation Menu.)

2. You will be on a page of gates with open or closed statuses. On the top tab right next to Open Door/Gate and Event Log click on **Access Tester**.

	Name ↑	Status	
☐	(0, 6) Request to Exit - Device 7	Closed	
☐	(0, 7) Request to Exit - Device 7	Closed	
☐	(0, 8) Request to Exit - Device 120	Open (Held)	
☐	(0, 9) Request to Exit - Device 12	Closed	
☐	(1, 1) Entry Gate	Open by Lighting Area	
☐	(128, 5) kian relay - W1 BUZZER	Closed (Held)	
☐	(128, 6) kian relay - W1 HOLD	Closed	
☐	(2, 1) Exit Gate	Closed (Held)	

Items per page: 10   1 - 8 of 8

3. On the Access Tester page, you will be greeted with this screen. This page is primarily used to test a user's access code. The main page presents you an event log with date/time.
   a. In the box, you can enter the user's code and which device they have authorization for to check validity.
   b. The arrow points to the search bar, here you can look up specific users and their event log with time stamps.
