

# UNIT SECURITY

Distinguish Your Facility  
With Individual Door Alarms

Individual unit security is a crucial component of a comprehensive security strategy. Give your tenants peace of mind and distinguish yourself as a best-in-class self-storage operation with PTI's upgraded door security solutions.

DOORALARMS

**WIRELESS** Without the need to alter or replace existing infrastructure, wireless door alarms are ideal for retrofitting existing sites. These alarm systems have a quick and easy installation, making them perfect for facilities that also plan to expand in the future.

**HARD-WIRED** door alarms are a reliable and cost-effective solution for your security system. The simplicity of installation makes wired door alarms easy to integrate into new construction and is a preferred choice for large-scale self-storage sites.
