COREGRAPHICS

INTERACTIVE SITE MAPPING SOFTWARE SYSTEM

A valuable component of every facility, COREGraphics software system enhances the image of your property to existing and potential customers. The attractive, customizable program can improve the management, marketing, and operational aspects of your business while increasing profitability. The system is flexible in that can adjust as the business grows, and the user-friendly management tool is customized to track site activity in real-time. These innovative features equip the facility manager with the ultimate tools to enhance customer confidence by demonstrating attention to security and management expertise.

SYSTEM FEATURES

- >> Fully integrates with legacy COREGraphics maps
- >> Viewer program that is fully customizable to fit your layout
- >> Built on Unity Gaming Engine for enhanced graphics, providing a 3D appearance to 2D sitemaps
- >> Enhanced details that can show everything from intercom stations and keypads to dumpsters and restrooms
- >> Flexibility that allows for the Site Assistant software to grow with the facility as size and capabilities expand
- >> Includes an "On-Site" information bar with real-time updates
- >> Customized and color-coded facility maps provide the ability to quickly track site activity and guide prospective customers to featured units

INTEGRATED SOLUTIONS

Products and services from PTI Security Systems can be configured to address every facility's unique requirements. Capitalize on COREGraphics software capabilities with:

- >> Alert systems, for an added layer of security in areas of the facility that require notification or protection
- >> Wireless door alarms, to further illustrate the exact status of every door in the facility
- >> COREGraphics is interactive with the FalconXT system controller and StorLogix software from PTI Security Systems and can display security logs through a split-screen presentation

TECHNOLOGY

COREGraphics software from PTI Security Systems features a Windows®-based high-resolution graphical image that provides detailed characteristics of the site. Images are customized to the individual facility using the Unity Gaming engine to maximize the presentation on the monitor.

MINIMUM REQUIREMENTS

The computer in which the COREGraphics software is running must include the following:

- >> 32-bit (x86) or 64-bit (x64)* Windows 7 SP1, 8, 8.1, 10, or higher
- >> All necessary updates and service packs for Windows should be loaded onto the computer before beginning installation
- >> 1024 x 768 Large Screen Monitor recommended
- >> 128 MB Video Card or higher (Requires 512MB+ for High Definition and 1GB+ for 3D)
- >> PTI Graphics Serial Adapter (Part #PGRASIA)
