

DOORBOSS

A completely wireless electronic locking device that provides the highest level of individualized door security in the self-storage industry.

SIMPLIFY LOCK CHECKS

DoorBoss automates lock checks and eliminates the need for staff to manually walk the facility

BOOST COLLECTIONS

Automated overlocking prevents tenant's access to their unit until balances are paid in full

TRULY WIRELESS

Powered by an extended-life lithium battery, there's no need to run wires to each individual unit

RETROFITTABLE

A cost-effective solution that doesn't disrupt your tenants or require investing in new doors

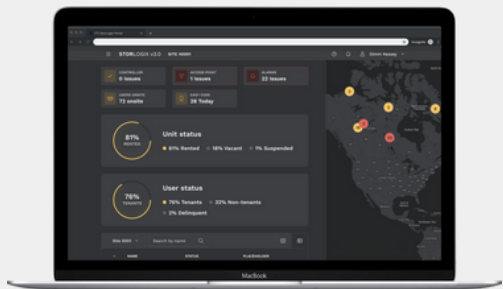

INTEGRATED SOLUTION

Integrates with other security solutions for real-time visibility into unit status for tenants & operators

SIMPLE INSTALLATION

Can be installed on an occupied door in under 4 minutes -- without the need to open units!

BONUS FEATURE

Self-storage owners and operators can pair StorLogix Cloud and DoorBoss to create an individualized notification system. If a DoorBoss smart lock is tampered with, StorLogix Cloud will notify management immediately via customizable messages.
